

Assignment 4

Interactive Data Visualization

SS 20

Sabrina Piasecki

Topics:

Multi-Variate Data,
Scatter Plot, Parallel Coordinates

In Class

- Data Set "Leaves"
- Measurement results of the growth of leaves from three different types of trees at different growing periods

Type of tree	Age of Leaf	Length of Leaf	Width of Leaf
Maple	3 weeks	2.2 cm	1.8 cm
Maple	2 months	4.6 cm	5.5 cm
Maple	4 months	8.8 cm	10.0 cm
Aspen	3 weeks	1.2 cm	1.2 cm
Aspen	2 months	3.6 cm	3.6 cm
Aspen	4 months	7.5 cm	7.5 cm
Pear-Tree	3 weeks	3.2 cm	1.2 cm
Pear-Tree	2 months	7.0 cm	2.5 cm
Pear-Tree	4 months	11.0 cm	4.0 cm

a) Set up the data model:

Describe the characteristics of the data set “Leaves”.

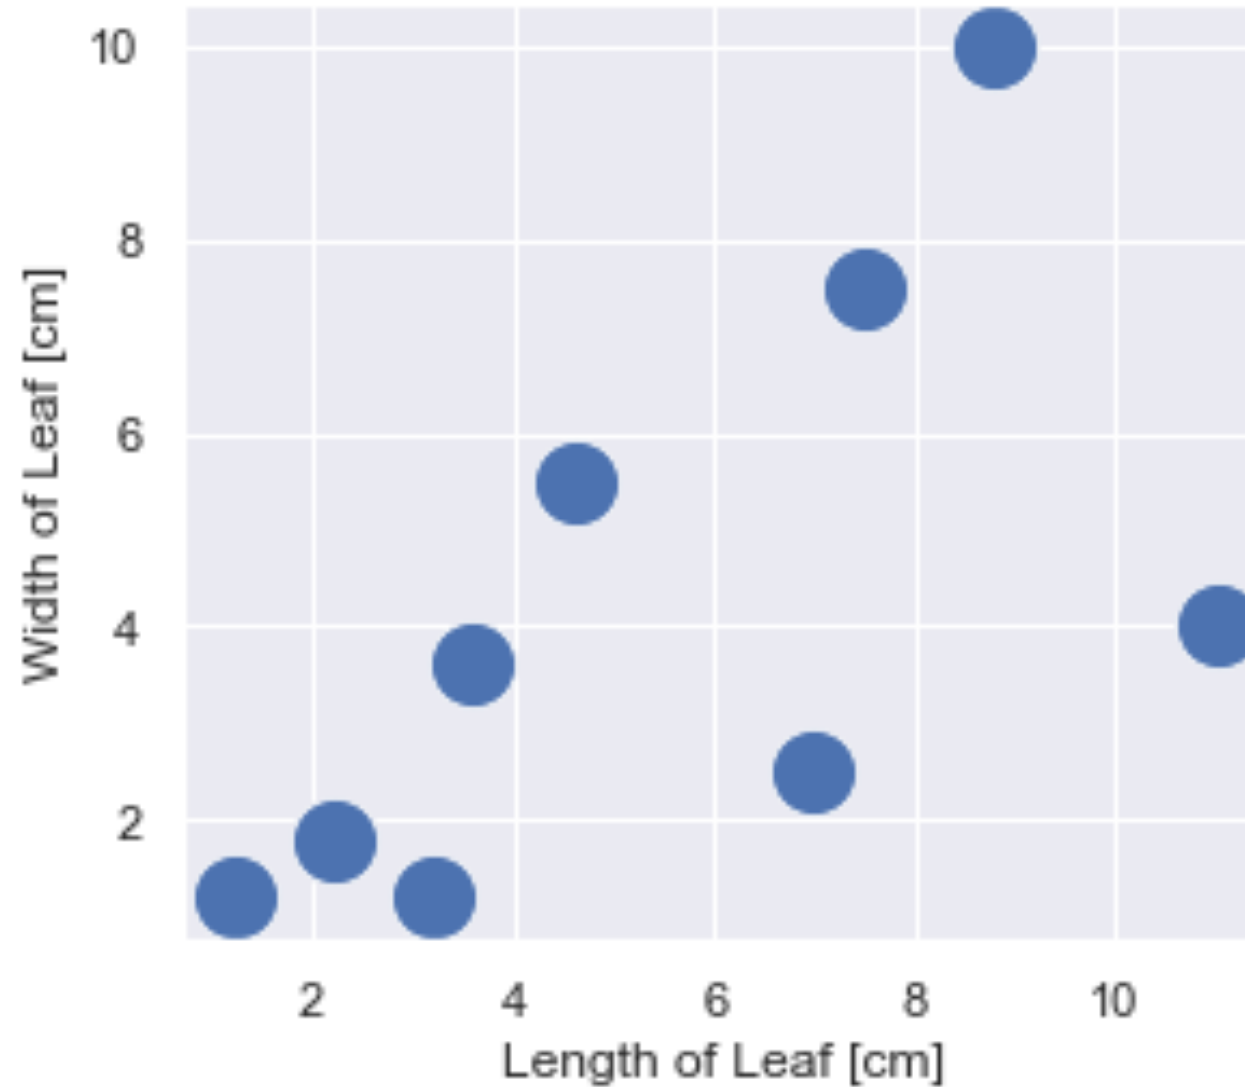

b) Draw a scatter plot of length and width of leaves.

c) Visualize data set with scatter plot matrix.

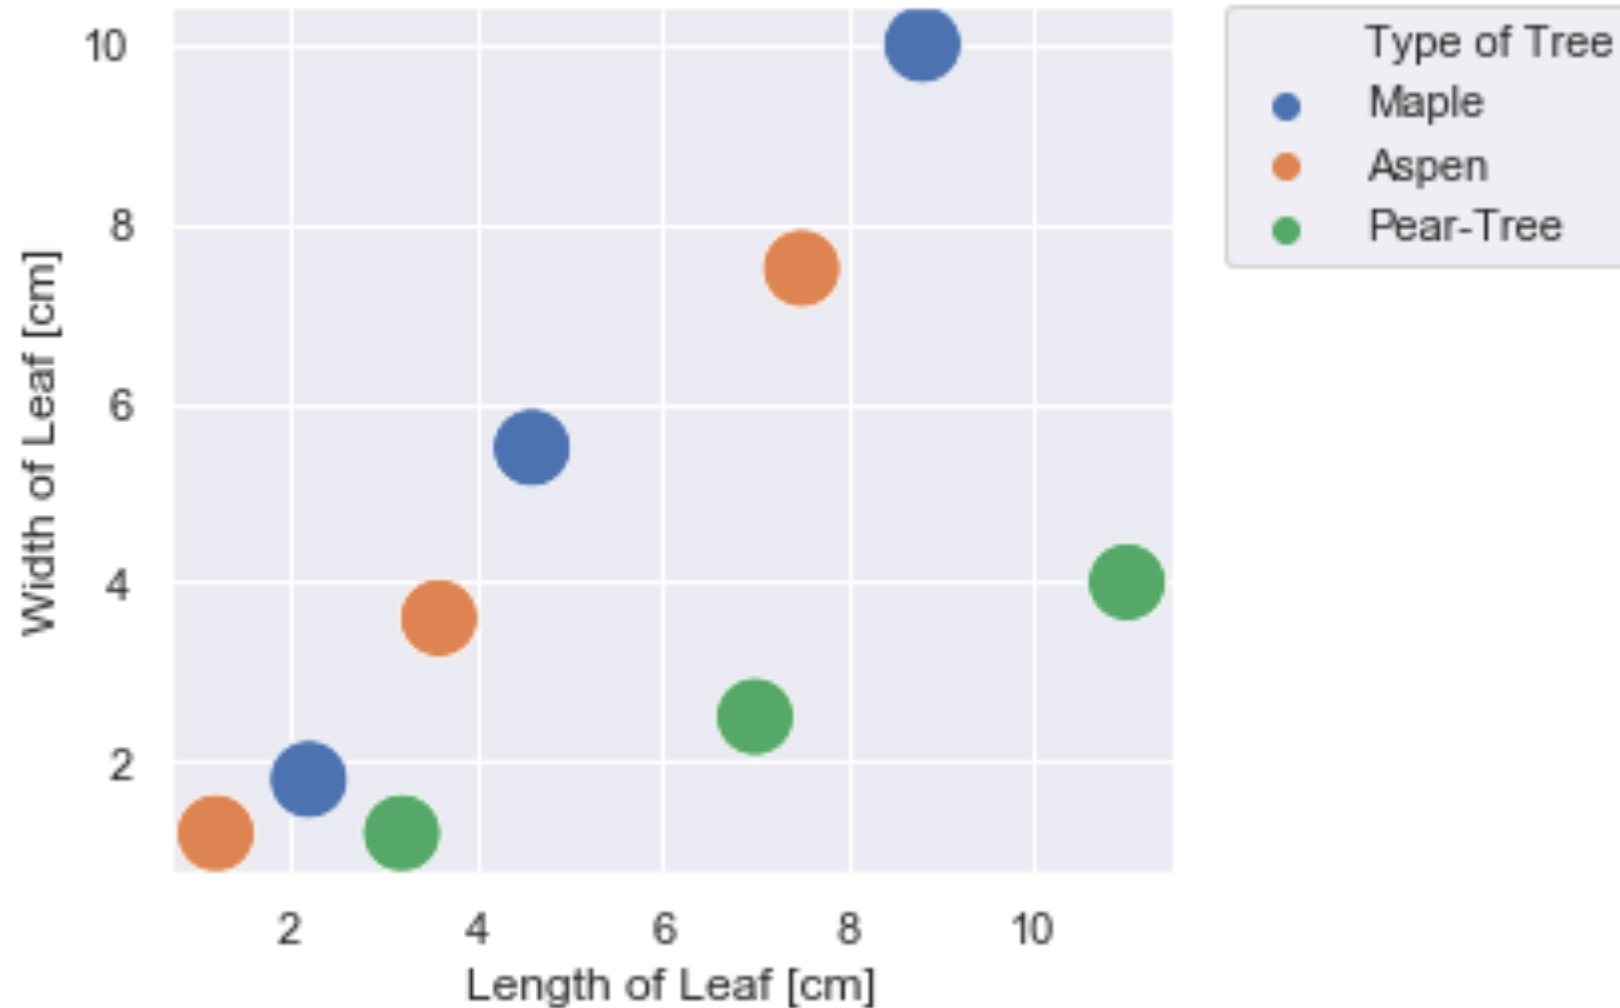

d) Visualize data set with parallel coordinates.

Type of Tree	Age of Leaf	Length of Leaf	Width of Leaf
Nominal data	Quantitative/ ordinal data	Quantitative data	Quantitative data

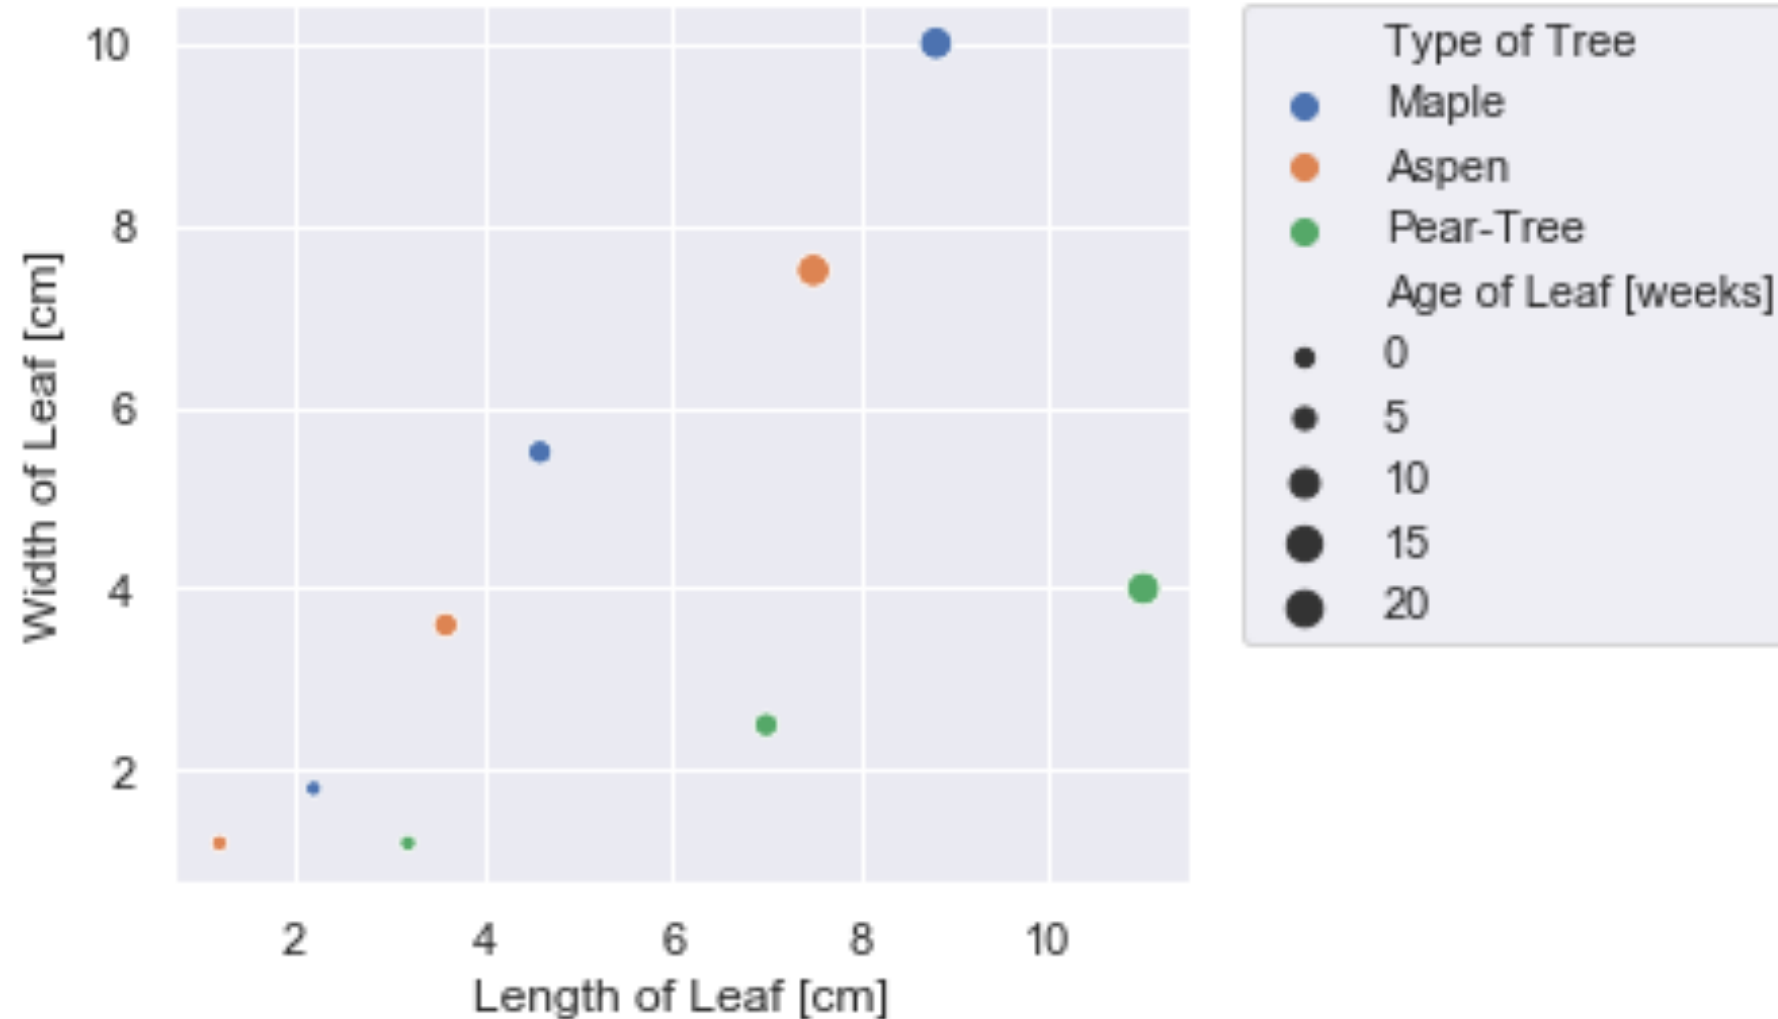

Assignment 4 – In Class b)

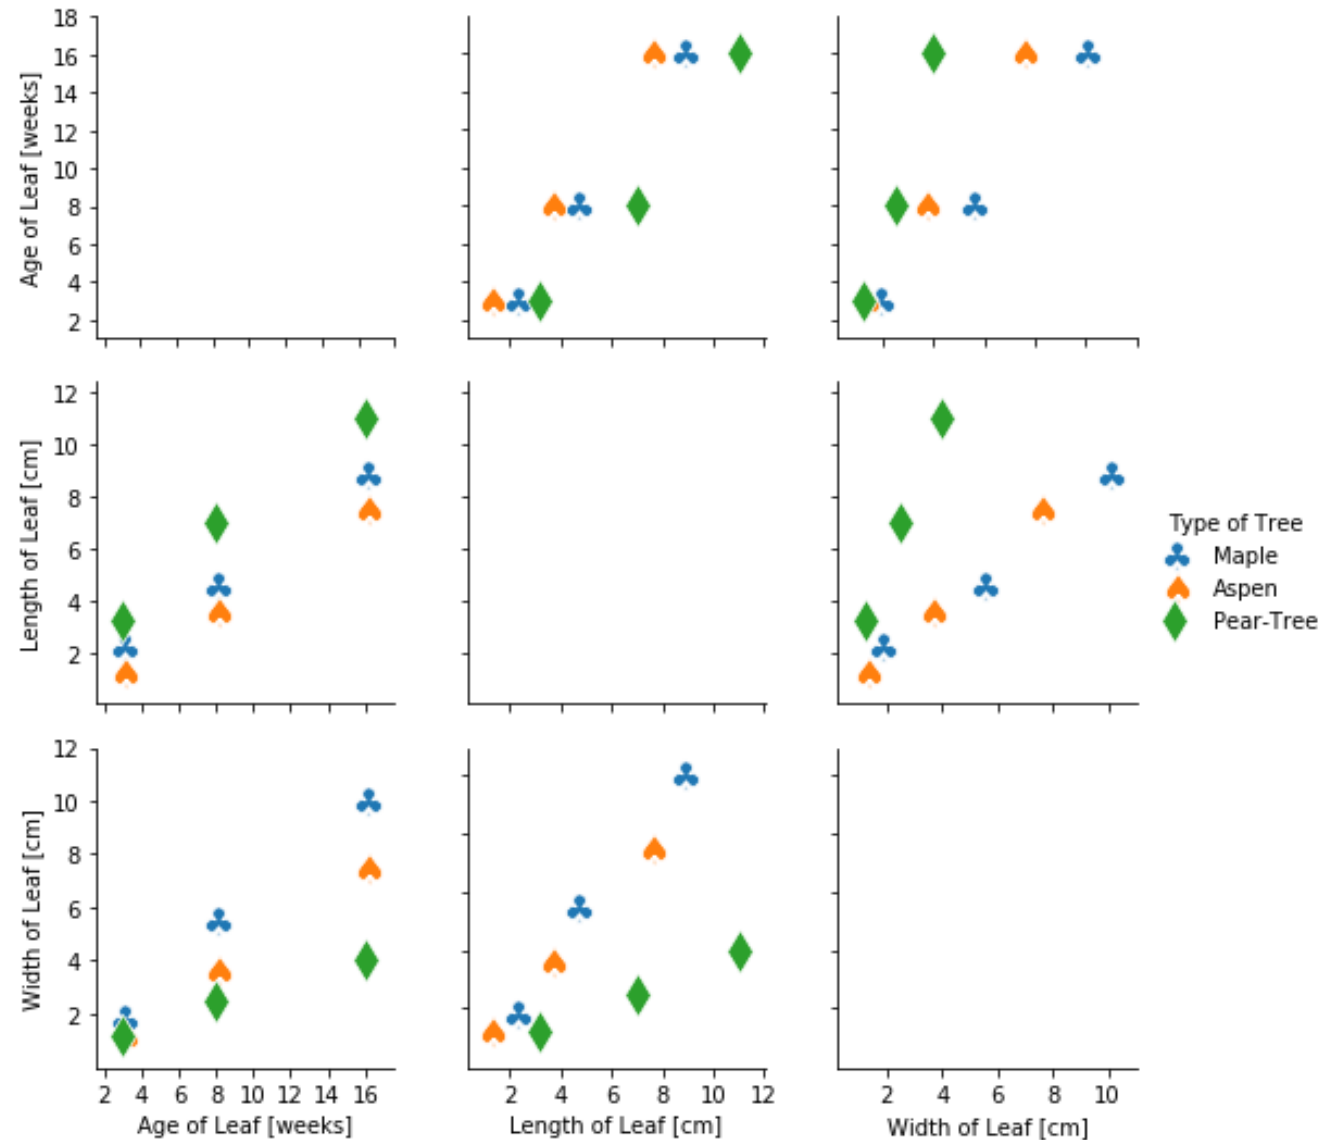

Assignment 4 – In Class b)

Assignment 4 – In Class b)

Assignment 4 – In Class c)

Bad solution:

Leaf - Parallel Coordinates

Assignment 4 – In Class d)

Good solution:

Good solution:

Leaf - Parallel Coordinates
